

Canon Research Centre France (CRF) Environmental Policy

CRF Environmental Policy has been built on the fundamental principles outlined in the Canon Group's Environmental Charter. It reflects our operations in the region and the impact we have on the environment and the community.

The corporate philosophy of Kyosei

Our vision is to grow the positive power of imaging technology and services. This demonstrates our commitment to *Kyosei*: living and working together for the common good.

CRF Environmental Commitment

In line with the Kyosei philosophy, we strive to do research while respecting planetary boundaries. We aim to create positive social change and minimize our impact on the environment in our operations including by providing innovative technologies to Canon.

The Fundamental Policies for CRF Environmental Assurance

We deliver our commitment by adhering to the following policies:

1. Establish and operate an environmental management system designed to continuously improve our environmental performance*.
2. Increase the environmental awareness of CRF members and empower and encourage them to minimize Canon's environmental footprint*.
3. In our purchasing and outsourcing we give priority to products and services with lower environmental impact*.
4. Operate in accordance with all relevant environmental regulations and compliance obligations in France and in Europe as well as upholding Canon Group environmental assurance agreements.
5. Reduce the carbon footprint of our operations and actively pursue protection of the Environment, and resource conservation measures.
6. Encourage collection and recycling in our premises to promote a circular economy.
7. Improve biodiversity on our green area through BIRDS project.

** The terms environmental performance, footprint or impact include but are not limited to: GHG emissions/ resource use/ energy consumption/ chemical substance use.*
